Regulation (EU) 2025/40 (PPWR), Article 5
Requirements for substances in packaging

Dear Sir or Madam,

Thank you very much for your enquiry.
With regard to compliance with Regulation (EU) 2025/40 on packaging and packaging waste ('PPWR'), we can inform you of the following:

We have analysed our packaging, products and supply chains and are implementing the PPWR obligations that apply to us. We are aware that, as our customer, you rely on deliveries of products in PPWR-compliant packaging. We are therefore working closely with our suppliers and monitoring future legislative acts from the European Commission in order to continue to meet the applicable PPWR requirements in the long term and ensure that our supply chains remain compliant with the law.

With regard to the heavy metal limit values relevant to our packaging as set out in Article 5(4) of the PPWR (the sum of the concentrations of lead, cadmium, mercury and hexavalent chromium must not exceed 100 mg/kg), we would like to inform you that we have no information regarding any non-compliance. Where and to the extent that we act as a packaging manufacturer or importer within the meaning of the PPWR, we specifically verify compliance with our suppliers and carefully review the information and declarations provided by them. In all other cases (in our capacity as a distributor), however, we would also like to point out in this context that, apart from applicable packaging labelling requirements, Article 19 of the PPWR does not impose any obligation to verify and check the quality requirements for packaging defined in Articles 5 to 12 of the PPWR within the supply chain.

In our capacity as a producer or importer, we keep the required EU declarations of conformity in accordance with Annex VIII and the technical documentation in accordance with Annex VII available for any enquiries from market surveillance authorities. Insofar as you purchase our products in the packaging supplied and process them yourself, we do not consider your organisation to be obliged to verify or keep EU declarations of conformity on hand.

Should you also require information from PRO-plast in order to fulfil your legal obligations under the PPWR, specifically the technical documentation of packaging requirements as set out in Articles 5 to 12, please let us know the specific requirements.
